SUMMARY

Graduate-level Technical Program and Project Manager with hands-on experience guiding cross-functional teams and improving delivery timelines by 15% through structured planning and execution. Strong communicator with the ability to present clearly across technical and non-technical audiences, eager to support semiconductor and electrical product development programs from concept through release.

TECHNICAL SKILLS

Program & Project Management: Program Schedule & Risk Management, Stakeholder Influence, New Product Introduction (NPI), Continuous Improvement, Product Development & Release (PDR), Agile/Scrum, Waterfall, Lean Six Sigma Methodologies.

Supply Chain & Operations: Vendor Management, RFI/RFQ/RFP Coordination, ERP/MRP Systems, Demand Planning, Process Improvement.

Engineering & Technical: Embedded Systems, PCB Design, Data-Driven Decision-Making.

Tools & Software: MS Project, JIRA, Confluence, Office Timeline, Excel, Power BI, SQL.

PROFESSIONAL EXPERIENCE

Project Manager | Maxgen Technologies, India

Jun 2022 - Dec 2023

- Coordinated project schedules and deliverables for electrical systems projects across 3+ concurrent workstreams and multiple clients, improving on-time milestone completion by 18%.
- Tracked project risks, dependencies, and action items across engineering, design, and testing phases using structured status trackers and risk registers, reducing schedule slippage by 12% through active follow-up.
- Facilitated stakeholder meetings with engineering and client teams and prepared status reports for leadership, improving visibility into project progress and decision-making turnaround by 20%.
- Supported resource planning and task allocation across electrical design and testing teams, streamlining handoffs and reducing delays by 14%.
- Assisted in budget monitoring and coordination with design and engineering teams for electrical hardware procurement and project execution, helping maintain project spend within 8% of allocated budget.

Supply Chain Project Manager (Volunteer) | Street Cause Organization, Hyderabad, India

Jan 2021 - Jun 2022

- Coordinated multi-location operational programs with cross-functional teams, demonstrating influence skills to guide stakeholders and improving delivery timelines 15% through structured planning and execution.
- Managed vendor relationships and supply chain operations, enforcing schedule adherence and quality standards while reducing material defects 10% through improved process controls.
- Implemented process improvements in workflows using Lean and Six Sigma principles to increase efficiency and cost-effectiveness across volunteer-led operational programs.

EDUCATION

M.S. in Engineering and Technology Management | Portland State University, Portland, OR

GPA: 3.8/4.0 | Jan 2024 - Mar 2026

B. Tech in Electrical and Electronics Engineering | Vasavi College of Engineering, India

GPA: 3.5/4.0 | Aug 2019 - Jul 2023

KEY PROJECTS

AI Integration in Project Resource Allocation - Literature Review

Conducted a comprehensive literature review on how AI is transforming resource allocation in project management, analyzing limitations of traditional approaches (Gantt charts, CPM scheduling) in dynamic, multi-project, and Agile environments. Reviewed AI-driven techniques including machine learning, neural networks, and metaheuristic optimization (Genetic Algorithms, Simulated Annealing) for predictive planning and intelligent task assignment, identifying efficiency gains of up to 30% in task completion.

Tesla Gigafactory Site Selection - Engineering Economics Analysis

Managed a \$143,000 evaluation budget to build a data-driven site selection framework, analyzing land/construction costs, energy access, labor, and logistics across multiple candidate sites. Developed a phased implementation plan using quantitative KPIs and a Work Breakdown Structure to align site selection with strategic growth objectives.

Agile PMO Transformation Proposal - Daimler Trucks North America

Developed a proposal to transition a traditional Continuous Improvement PMO to an Agile PMO framework, including a structured WBS, Agile governance model, and Lean Portfolio Management approach supported by JIRA, Confluence, and Power BI dashboards. Designed a phased rollout strategy covering foundation setup, pilot execution, and enterprise scaling.

Energy Benefit Analysis for Portland Metro Area

Analyzed financial performance, energy output, and sustainability metrics across multiple wind and solar installations using statistical methods. Built visual dashboards and reports to communicate cost-effectiveness trends and actionable insights.

Green Mind AI PC - Go-to-Market Strategy & Financial Plan

Developed an end-to-end go-to-market strategy for a sustainable AI/ML-powered PC, combining market segmentation, pricing strategy, and dynamic financial modeling (sales forecasts, cash flow, gross margin, ROI). Delivered a 27.81% gross margin and a 3.42-year payback period, balancing product capability with cost trade-offs.

Low Power Area-Efficient ALU with Low Power Full Adder

Designed a 4-bit ALU (ADD, SUB, AND, OR, XOR, XNOR) using XNOR-based full adder logic and 3-bit control signaling, reducing power consumption by ~50% versus traditional designs. Verified correctness across all 16 input combinations through hardware simulation, optimizing power, area, and speed trade-offs.

CERTIFICATIONS & AWARDS

Lean Six Sigma White Belt Certification | **Project Management Graduate Certificate** - Portland State University

Dunder F. Kocaoglu ETM Fellowship - Portland State University (Academic Excellence Award)
